

1) Student Management System

```
class Student {
```

```
String n; int n[] m;
```

```
double a() { int s=0; for (int  
x:m) s+=x; return s/m.length; }
```

```
void r()
```

```
{ System.out.println(a() >= 50? "
```

```
"); }
```

2) Book

```
class B {
```

```
boolean av=true;
```

```
void issue() { av=false; }
```

```
void set() { av=true; }
```

```
void show()
```

```
{ System.out.println(av); }
```

```
}
```

3) Employee

```
class E {
```

```
double b;
```

```
double g() { return b*1.3; }
```

```
double n() { return g() - b*0.1; }
```

```
void p()
```

```
{ System.out.println(g() + " " + n()); }
```

```
}
```

4) Shape

```
class sh { double a() { return 0; } }
```

```
class c extends sh { double r;
```

```
double a() { return 3.14 * r * r; } }
```

```

class R extends Sh { double
  l, b; double a() { return l * b; }
  { return 0.5 * l * b; }
}

```

5. Vehicle

```

class V { void d() { } }
class T2 extends V { void d()
  { System.out.println("2w"); } }
class F4 extends V { void d()
  { System.out.println("4w"); } }

```

6. Bank

```

class Bk { double b; }
class Sg extends Bk { void
  w(double x) { if (b >= x) b -= x; } }
class Cr extends Bk { void
  w(double x)
  { if (b + 5000 >= x) b -= x; } }

```

7. Patient

```

class Pr { double p; }
class E1 extends Pr { double d()
  { return p * 0.9; } }
class C1 extends Pr { double d()
  { return p * 0.8; } }
class Gr extends Pr { double
  d() { return p * 0.95; } }

```

8. Product

```

class P { }
class In extends P { int d, c;

```

```

int b ( ) { return d * C; } }
class Out extends P { int f;
int b ( ) { return f; } }

```

9. Staff

```

class St { protected double s; }
class T extends St { double a ( )
{ return s * 0.2; } }
class P extends T { double a ( )
{ return s * 0.2; } }

```

10. Device

```

class D { void e (String c) { } }
class L extends D { void
e (String c)
{ System.out.println (c); } }
class Th extends D { void e
(String c)
class Lo extends D { void e
(String c)
{ System.out.println (c); } }
